

Mohammad Taj Aldeen Alrefaiy

Location: Aleppo, Syria | mhd.alrefaiy@gmail.com | +963 980 296 722 | Nationality: Syrian | Date of Birth: January 15, 1997

SUMMARY

Software Engineer with a solid foundation in web application development and modern software solutions. Experienced in developing user interfaces and backend systems using widely adopted web technologies. Skilled in writing clean, maintainable code, analyzing business requirements, and transforming them into practical software solutions. Proficient in working within Agile teams and using version control systems such as Git. Passionate about continuous learning and delivering high-quality, efficient software products.

EDUCATION

Al-Shahba Private University

Bachelor's Degree in Computer and Mobile Communications Engineering, Faculty of Information Engineering 2019

EXPERIENCE

Front-End Web Developer

February 2022 – June 2023

Sappro Bilisim Elektronik Ltd.

- Developed responsive web interfaces using HTML, CSS, JavaScript, and modern front-end frameworks.
- Converted UI/UX designs into high-performance web pages compatible with multiple browsers and devices.
- Improved application performance, fixed bugs, and implemented UX best practices.
- Integrated REST APIs and collaborated with the development team using Git and Agile methodologies to ensure product quality.

Electronic Circuit Programmer

December 2021 – November 2022

Electronic Network Company

- Designed and programmed electronic circuits and embedded systems according to project requirements and technical specifications.
- Developed and tested software for microcontrollers, ensuring efficient performance and troubleshooting hardware-related issues.
- Performed testing, diagnostics, and maintenance of electronic circuits while analyzing test results to improve reliability and performance.
- Prepared technical documentation and collaborated with engineering teams to ensure seamless integration between software and electronic components.

Web Developer

August 2021 – July 2022

Idea Expert

- Designed and developed websites and web applications based on business and user requirements.
- Developed front-end and back-end components and integrated them with databases and various systems.
- Tested web applications, resolved software issues, and optimized performance and stability.
- Maintained and updated websites regularly while enhancing security and implementing new features.

TECHNICAL SKILLS

Proficient in HTML, CSS, JavaScript, and modern frameworks such as React.

Experience integrating and consuming REST APIs between front-end and back-end applications.

Proficient in Git and GitHub for version control and collaborative development.

Strong knowledge of performance optimization, Responsive Design, and Cross-Browser Compatibility.

Skilled in problem-solving, writing clean and maintainable code, and working within Agile/Scrum methodologies.

CERTIFICATIONS

Graphic Design Course – CPC Center (2019)
Advanced Programming (C# & SQL) – CPC Center (2017)
CCNA Routing & Switching – CPC Center (2015)
Computer Maintenance Course – Al-Shahba Private University (2015)
C# Programming Course – CPC Center (2015)

SOFT SKILLS

- Excellent communication skills. - Creative problem-solving abilities. - Ability to work effectively under pressure. - Strong time management and task prioritization skills. - Capable of working independently as well as collaboratively within a team.

TECHNICAL SKILLS

Microsoft Office - Microsoft Word: 90% - Microsoft PowerPoint: 80% - Microsoft Excel: 95%
Design Software - Adobe Photoshop: 90% - Adobe Illustrator: 85%

LANGUAGES

Arabic: Native Language
English - Reading: 100% - Writing: 100% - Listening: 85% - Speaking: 85%
Turkish: 70%
